Here is a basic machine that's adaptable, versatile and flexible enough to meet your changing needs as you grow. Available in 75" and 102" lengths, this machine has the durability to run up to three shifts per day without a hitch. Its side-lug conveyance system provides a positive case drive that is desirable for applications involving heavier filled cases. Our uniform sealers feature a single drive shaft system which eliminates case misalignment.

Simplified flap folding, easily adjustable, heavy duty welded 3/16" steel frame with a powder coated finish. As with all of MARQ's equipment, this machine is built to withstand the daily rigors of 24/7/365 applications. This machine is available for use with pressure sensitive tape or hotmelt glue and comes in your choice of standard, medium and large frame models.

Talk to a MARQ representative to see why this machine could work best for your application.

Standard Features

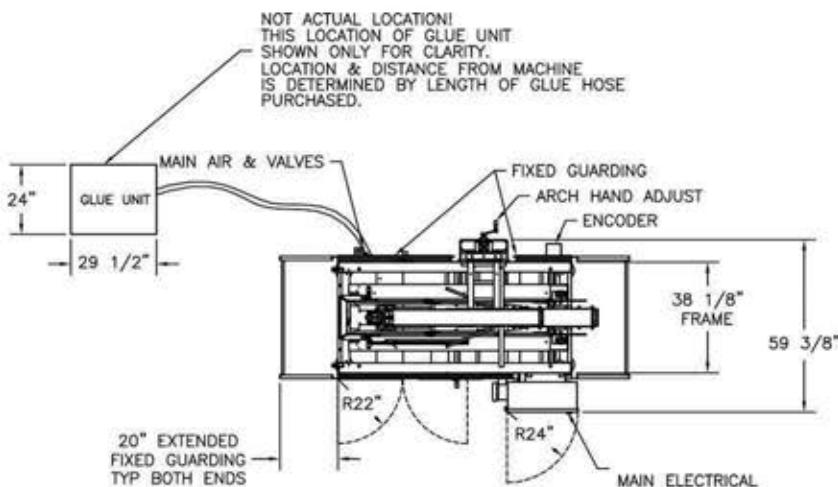

- Wiring practices conform to NFPA standards
- Operator friendly design
- Quick changeover
- Fully guarded
- Continuous feed hopper
- UL508A listed electrical panels
